

PKWARE and Health Information Exchanges

LOWER YOUR OPERATING COSTS WITH THE ONLY INTEROPERABLE, COMPLIANT SOLUTION THAT ENCRYPTS AND REDUCES DATA IN ONE EASY STEP.

Government mandates and private initiatives are driving the creation of Health Information Exchange (HIEs). The vast amount of patient data shared within HIEs needs to be secured to meet government and industry security standards. PKWARE guarantees encryption of data in transit and at rest across computing platforms while simultaneously reducing file size to deliver storage and data transfer efficiencies.

While an HIE provides more timely, efficient, effective, equitable and patient-centered care by mobilizing data across organizations, it presents serious security risks. Sensitive Personal Health Information (PHI) moving between organizations through HIE systems is vulnerable to exposure. At the same time, moving huge amounts of medical information within the HIE system puts strain on infrastructure and increases elapsed time for data processing and transfer.

FASTER ROI & HIGHER SLAs THROUGH LOWER OPERATING COSTS

- **REDUCED COSTS** PKWARE dramatically reduces costs associated with HIE systems by combining the encryption and compression process, making secure data transfer more efficient and timely, resulting in more competitive service levels and lower storage costs. The benefit? A shorter time to a Return on Investment (ROI) for your HIE.
- **ASSURED COMPLIANCE** The PKWARE Solution meets the encryption requirements of ONC MU Stage 1, IHE, ISO, H7, HIPPA, Hi Tech, HiTrust and PHI regulatory standards and is FIPS 140-2 certified.
- **PROVEN IN HEALTHCARE AND GOVERNMENT** The Centers for Medicaid and Medicare use the PKWARE Solution to protect PHI that they collect from the state programs, and that they share with universities, research hospitals, and pharmaceutical companies.
- **SECURED PORTABILITY** PKWARE protects data at rest and in motion regardless of transmission method, inside and outside the organization and within the HIE system to provide complete portability across all major operating systems and computing platforms.
- **EASE OF USE** Easily deployed in hosted or on-site data centers, the PKWARE Solution simplifies data security by automating encryption processes.
- **CENTRALIZED MANAGEMENT** A contingency key gives IT departments access to encrypted data in the event of an audit, or for recovery purposes while policy management controls how and when data is encrypted.

A Comprehensive Solution for all major OS and devices, eliminating the need for multiple independent solutions

Adaptable/Flexible and Portable to freely move data between disparate operating environments, including virtualized, in the most secure and efficient manner

End-to-End Protection through data-centric security that protects your information in transmission as well as behind your firewalls

Transferable Security through the ability to send, receive and store data in its compressed and secure state, guaranteeing even after transfer it can only be accessed by the intended party

Proven & Trusted by over 30,000 Companies across the Globe

PKWARE is the only choice for complete integration of compression, encryption, portability and file management in a remarkably simple platform-neutral, yet secure data container.

PKWARE is installed in over 30,000 corporate entities, including 90% of the Fortune 100. It is the choice of 23 of the top 25 global banks. The PKWARE Solution is used by over 200 government agencies including the U.S. Department of Defense, Internal Revenue Service, Federal Aviation Administration, Centers for Medicare & Medicaid Services...and by major retailers around the world.

Only the PKWARE Solution offers complete portability for reducing, securing, moving and storing data simultaneously across IBM, Windows, HP-UX, Linux, Solaris, and other major platforms.

Leverage your existing IT infrastructure with our production-ready and progressive data management solution in physical, virtual, and cloud environments.

About PKWARE, Inc.

More than two decades ago, PKWARE revolutionized data compression with the invention of the ZIP standard. Today, through continuous innovation and development, PKWARE has become the industry standard for data reduction, security, portability and file management.

Financial services, banking, government, healthcare, and retail organizations use the PKWARE Solution to protect sensitive data, meet compliance requirements, avoid liability risk and reduce their overall costs and operational overhead.

PKWARE, a privately held company, was founded in 1986 and is based in Milwaukee, Wisconsin; additional offices are located in New York, Ohio, and the United Kingdom.
