

Consolidating data from disparate systems demands a more evolved enterprise solution.

As you acquire new businesses or combine existing business units, there is a requirement to consolidate data across all major enterprise computing platforms. And, you need to ensure the process meets internal policies, industry regulations, and government mandates. You need a solution that can effectively and efficiently handle data consolidation, while offering strong security you can depend on.

SECUREZIP FOR DATA
CONSOLIDATION IN BANKING
& FINANCIAL SERVICES

SecureZIP®

FEATURES & BENEFITS

Reduce conversion costs of multi-platform data exchange.

SecureZIP works across all major enterprise computing platforms.

Lower IT infrastructure costs.

Reducing file size up to 98% accelerates transmission times and improves processing efficiency, lowering costs.

Exceed compliance requirements.

Ensure the secure exchange of PII to meet industry mandates and regulations. Avoid the risk of fees and penalties.

Securely signed, sealed, and delivered.

Encrypt files using passphrases, X.509 digital certificates, or both. Ensure data integrity with digital signatures.

Increase partner acceptance & accelerate deployments.

SecureZIP PartnerLink offers all the benefits of SecureZIP and is available at no cost to partners.

Secure sensitive information *and* conserve storage space.

By protecting and compressing data, SecureZIP helps banking and financial services organizations tackle the challenge of efficient data consolidation. Storage space is conserved. Sensitive information is secure. All without added infrastructure costs for you or your IT partners.

Your unique challenges

Major organizational changes, including mergers and acquisitions, require data to be consolidated from disparate computing platforms.

Conversion and transfer of large amounts of information for data consolidation is extremely expensive and time consuming.

Internal policies, industry regulations, and government mandates require the protection of sensitive data during the consolidation process.

Licensing products for both long- and short-term data conversion projects is costly.

Our unique solutions

SecureZIP is the only data compression and security solution that is truly interoperable. Exchange data across all major enterprise computing platforms.

SecureZIP reduces processing times up to 40% or more, reduces storage requirements up to 98%, and provides automatic file conversion. Eliminate data conversion costs.

SecureZIP strongly encrypts data using passphrases, X.509 digital certificates, or both and is FIPS 140 compliant. Meet compliance requirements without negatively impacting data consolidation efforts.

SecureZIP is delivered in both a perpetual and term licensing model.
