

Maintaining organizational control over increasing amounts of sensitive data demands a more evolved enterprise solution.

Your organization is confronted with increasing amounts of sensitive data - data that often needs to be moved from secure data centers to unsecure locations and/or networks. Simple encryption solutions just don't get the job done. In order to maintain access to sensitive data without placing additional pressure on your IT infrastructure, you need a flexible solution that can secure additional data, while ensuring your organization remains in control.

FEATURES & BENEFITS

Exceed compliance requirements.

Ensure the secure exchange of PII & other sensitive data to meet government mandates and regulations.

Mitigate business risk.

Ensure data availability and recoverability to mitigate risk associated with unstructured data.

Securely sign, seal, and deliver.

Encrypt files using passphrases, X.509 digital certificates, or both. Ensure data integrity with digital signatures.

Reduce IT infrastructure costs.

Add an additional layer of end-to-end security that does not require replacement of existing technologies.

Increase partner acceptance & accelerate deployments.

SecureZIP PartnerLink offers all the benefits of SecureZIP and is available at no cost to partners.

Secure sensitive information *and* maintain access to your data.

An important part of an effective data security strategy is not only protecting your sensitive data, but ensuring the right individuals within your organization can access it at any time. SecureZIP allows IT administrators to ensure data availability across your organization. Sensitive information is secure. Access to your data is guaranteed.

Your unique challenges

Protecting and maintaining control of data requires a comprehensive solution for audit and recovery.

Internal policies, industry mandates, and government regulations demand strong protection of sensitive data. Non-compliance results in considerable fines and penalties - over \$200 per record, averaging over \$6.5 million per data breach.

Addressing data security means substantial costs for replacing or changing the existing infrastructure.

Nightly back-ups of files, emails, calendar attachments, etc. require huge amounts of storage space.

Our unique solutions

SecureZIP allows you to access data across your organization for internal/external audit or eDiscovery. Ensure data availability without fearing the auditors.

SecureZIP strongly encrypts data using passphrases, digital certificates, or both. Meet compliance requirements. Eliminate the risks of a data breach such as substantial fines, negative publicity, and damage to your reputation.

SecureZIP adds a layer of end-to-end data security without requiring the replacement of other existing technologies. Leverage your existing investments. Avoid additional costs.

SecureZIP not only protects your data, it also conserves substantial back-up storage space - up to 98%. Maximize existing storage space and reduce time required for nightly back-ups.
