

# Increasing costs and compliance regulations demand a more evolved enterprise solution.

Whether you're handling settlement, customer master, or general ledger files, your organization needs to exchange huge volumes of sensitive information. As a result, you are faced with protecting that information according to internal policies, industry mandates, and government regulations. You need a solution that can respond to multiple security requirements with your IT budget constraints in mind.

## SECUREZIP FOR FILE EXCHANGE IN BANKING & FINANCIAL SERVICES

# SecureZIP®

### FEATURES & BENEFITS

#### Exceed compliance requirements.

Ensure the secure exchange of PII & other sensitive data to meet government mandates and industry regulations.

#### Securely signed, sealed, and delivered.

Encrypt files using passphrases, X.509 digital certificates, or both. Ensure data integrity with digital signatures.

#### Reduce IT infrastructure costs.

Reducing file size up to 98% accelerates transmission times and improves processing efficiency, lowering costs.

#### Eliminate conversion costs of multi-platform data exchange.

SecureZIP works across all major enterprise computing platforms.

#### Exchange data securely with external partners.

Extend your security policies without added infrastructure costs for you or your partners.

## Secure sensitive information *and* reduce costs.

By protecting and compressing data, SecureZIP helps banking and financial services companies tackle the challenge of increasing volumes of data. Sensitive information is secure. Spending is reduced.

### Your unique challenges

Internal policies, industry mandates, and government regulations demand strong protection of sensitive data. Non-compliance results in considerable fines and penalties – over \$200 per record, averaging over \$6.5 million per data breach.

Implementing strong data security is getting increasingly more expensive and complex.

Protecting and maintaining control of data requires a comprehensive solution for audit and recovery.

Volumes of data keep growing. But, efficient data transfer can't be sacrificed.

### Our unique solutions

SecureZIP strongly encrypts data using passphrases, X.509 digital certificates, or both. Meet compliance requirements. Eliminate the risk of fees and penalties.

SecureZIP not only protects your data, it also compresses and aggregates. Reduce file size and required storage space up to 98%. Simplify data security.

SecureZIP allows you to access data across your organization for internal/external audit or eDiscovery. Enforce data security policies *and* ensure data availability without fearing the auditors.

SecureZIP reduces transmission times up to 40% or more. More data can be transferred in shorter amounts of time.
