

Retailer #1

Industry

- Retail

Customer Profile

- Leading auto parts retailer operating over 3,000 stores

Challenges

- PCI Compliance with an immediate deadline
- Digital certificate and signature capabilities

PKWARE® Solution

- SecureZIP® for i5/OS®

Results

- Met deadline enforced by PCI (10-day deployment)
- Able to encrypt using digital certificates and signatures

Company Background

Our client is a leader in the auto parts retail industry, operating more than 3,000 stores in the United States, Puerto Rico, and the Virgin Islands. In addition to retail stores, the retailer does business with commercial customers as well.

Challenges and Requirements

Transactional credit card data is collected on behalf of customers at the retail locations. The information is then sent to corporate headquarters for processing on their i5/OS midrange system. As a retailer, the company was required to meet PCI compliance requirements, with a rapidly approaching deadline.

Needing to implement a solution in 10 days, the retailer needed to quickly find and install a data security solution. They also wanted the ability to use an encryption product that could utilize digital certificates and signatures for authentication purposes.

The Solution - SecureZIP

SecureZIP allowed the retailer to compress their data while adding security to their existing processes. SecureZIP was also cost effective and could be purchased and implemented to meet their 10-day deployment time frame. Additionally, SecureZIP allowed the retailer to utilize digital certificates and signatures, enhancing and accelerating business growth.

Out of respect for our clients' privacy, names have been omitted from customer success stories. Many of our clients are happy to discuss their experience with PKWARE products. If you are interested in learning more information about a particular customer success story, please contact us at <http://www.pkware.com/contactus>
