

PKWARE Partner Program

Expanding Opportunities,
Satisfying Customers

Why Partner with PKWARE?

Founded in 1986, PKWARE is the premier software vendor in the data-centric security and privacy market that is uniquely positioned to provide world-class data discovery, protection, and monitoring capabilities on structured and unstructured sensitive data. PKWARE has experienced explosive growth over the last four years as compliance with recent data privacy and security laws like the General Data Protection Regulation (GDPR) and the California Consumer Privacy Act (CCPA), as well as longstanding mandates such as the Payment Card Industry Data Security Standard (PCI DSS) and the Health Insurance Portability and Accountability Act (HIPAA), have become important boardroom topics.

PKWARE customers include some of the most recognizable brands in the world across healthcare, technology, financial services, education, and government. A PKWARE partnership is a differentiator for your company and provides the perfect platform to assist with gaining access to new accounts or rapidly growing existing customer accounts.

As a partner-centric company, PKWARE is committed to growing together to make this a mutually beneficial and profitable relationship. The PKWARE partnership program includes benefits for technology, systems integrator, VAR, and distributor partners. As you consider a partnership with PKWARE, there are three topics to discuss that will help you decide if a partnership with PKWARE is the right move:

- **Technology and Use Cases**
- **Partnership Rewards**

Partnerships are key to our customers' success, and we are committed to going above and beyond to help train and grow sales for each partner, so it's a win-win relationship for everyone.

Technology and Use Cases

With PKWARE, you are partnering to offer a data discovery and protection solution that has the broadest coverage and scalability in the industry. The PK Protect suite has been built to scan as little as a few terabytes, yet can scale to hundreds of petabytes. With installation taking less than an hour, PKWARE has an extremely quick time to value for users.

As we go to market together, PKWARE has four common technology use cases that many of our current customers and prospects employ. PKWARE is by no means limited to these use cases; these are simply proven paths to success with the highest win rates.

Analytics

Scan datasets for PII, and then anonymize or monitor the data for safe analytics, even in multi-tenant environments.

Cloud Migration

Scan all environments before, during, and after moving data to the cloud to determine sensitive elements, access controls, and breach risks.

Test/Dev

Give developers anonymized but semantically equivalent datasets that can be used for application testing and quality control.

Privacy Compliance

Automate privacy operations with identity-based scanning, risk profiling, DSAR fulfillment, and other reporting to meet requirements and obligations.

Partnership Rewards

PKWARE offers three different partner tiers that directly tie partner metrics to partner rewards. The rewards include better pricing, strategic alignment, and market development funds (MDF) but require more commitment from the partner.

Each partner has the ability to choose their partner tier and will be managed to that level of commitment and metrics. If a partner outperforms their metrics, they will automatically be eligible to upgrade to the next tier.

Partner Tier Levels

- **Premier:** Premier status is our basic partnership tier and requires a commitment of \$150,000 in revenue and one trained pre-sales engineer. The licensing discount is 10 percent and includes access to the partner demo environment.
- **Platinum:** This tier requires a \$300,000 revenue commitment with ten registered deals and three people trained. The benefits are increased margin of 18 percent, jointly branded collateral, and roadmap discussions.
- **Elite:** This tier requires a \$500,000 revenue commitment with registered deals and three people trained. The benefits include increased margin of 25 percent, jointly branded collateral, and roadmap discussions.

	Premier	Platinum	Elite
Requirements			
Revenue Quota	\$150,000	\$300,000	\$500,000
Opportunity Quota		10	20
Trained Engineers	1	3	4
Certified Engineers	1	3	6
Benefits			
License Discount	10%	18%	25%
